

**Symposium:
25 November 2015**

**Aquatic systems under pressure
Global change and human impact**

Theme 1 – Global Change and Fisheries

- Stephen Maberly, Centre for Ecology & Hydrology, UK
- Jef Huisman, University of Amsterdam
- Boris Worm, Dalhousie University, Canada
- André de Roos, University of Amsterdam

Theme 2 – Human Impact in Deltas

- Dick Vethaak, Free University Amsterdam / Deltares
- Harm van der Geest, University of Amsterdam
- Paul Bates, University of Bristol, UK
- Jeroen Aerts, Free University Amsterdam
- Wouter Botzen, Free University Amsterdam
- Joyeeta Gupta, University of Amsterdam

Location:

Koninklijk Instituut voor de Tropen (KIT),
Amsterdam, The Netherlands

Global Ecology (GE) is a research cluster of the University of Amsterdam that focuses on the functioning of ecosystems.

Amsterdam Water Science (AWS) is a new collaboration between the research groups in aquatic sciences of the University of Amsterdam and the Free University Amsterdam.

Please register for the symposium by sending an email to: AmsterdamWaterScience@gmail.com, before November 16th.
